NAVICAM® SB System

SMALL BOWEL CAPSULE ENDOSCOPY

A Safe and Simple Option for Small Bowel Examination

All small bowel capsule systems are not created equal. Using novel aspherical lens technology, the NaviCam® SB System has an image resolution of 640*480, frame rate of 0.5 - 6 FPS and an extended battery life in excess of 16 hours.

NaviCam[®] **Components**

Small Bowel Capsule

The ingestible capsule is a pill-sized video camera that the patient swallows with water before starting the examination. Inside the capsule, is a tiny camera that has its own light source. It continually captures images of the patient's small bowel.

Data Recorder

The Data Recorder is worn over the patient's clothes for the examination.

It is used to receive the picture images within the stomach that are captured by the capsule during the examination.
